Projects

Startup Hub Connect under MCIT (Django + AngularJS + Tailwind) 2025-03

Developed a startup aggregation and mentorship platform that connects entrepreneurs with accelerator hubs and industry mentors. Integrated a Django backend with an AngularJS + Tailwind CSS responsive frontend to enable real-time application tracking, event listings, and mentor assignments. Designed scalable APIs for seamless startup-hub communication, boosting early-stage collaboration in the African entrepreneurship ecosystem.

Jamii Wallet under MCIT (Financial Inclusion App) 2025-05

Built a secure Django-powered wallet system for local communities to send, receive, and track transactions with ease. Integrated M-Pesa and other mobile money APIs for seamless payments. Designed with offline-first capabilities to serve rural users with limited internet access, supporting Tanzania's push toward digital financial inclusion.

DCEA Platform under MCIT (Digital Case Exhibit & Property Management) 2025-03 Designed and developed a property exhibit management system for legal and investigative teams, enabling secure uploads, metadata tagging, and case-property linking. Optimized backend data handling with Django ORM and implemented a clean, intuitive Angular + Tailwind UI for rapid exhibit retrieval, reducing case preparation times by 35%.

LLM Book Recommender using Kaggle Datasets 2025-07

Created a Jupyter Notebook application powered by LangChain to recommend books based on conversational user input.
Integrated an LLM to parse preferences, query a custom dataset, and provide personalized reading suggestions with reasoning explanations.
Technologies Used: Python, LangChain, OpenAI API, Pandas, Jupyter Notebook, Prompt Engineering

Ministry of Minerals – MIS & Mining Investment Conference Website — *202*

Developed and supported the Management Information System (MIS) and the Mining Investment Conference website for the Ministry of Minerals. Built scalable backend services and responsive frontend interfaces to manage conference data, registrations, and stakeholder engagement. Ensured system stability and performance during high-traffic national events.
